

RODEL I. RAMOS

Software & AI Developer

ramosrodel.dev31@gmail.com

+63 970 538 7824

Tarlac City, Philippines

PROFESSIONAL SUMMARY

Result-driven Software & AI Developer with hands-on expertise in C#, Python, PHP, JavaScript, Google Apps Script, and MySQL, and a growing focus on AI/ML-driven automation and data-integrated solutions. Proven ability to build custom applications from grading and enrollment systems to profiler tools, web directories, and cloud-based Google Workspace automation that streamline operations and improve decision-making. Experienced in translating complex business requirements into scalable, maintainable systems. Seeking to apply full-stack development, database engineering, workflow automation, and AI exploration skills to enhance manufacturing workflows and operational efficiency at Pearl Talent.

CORE TECHNICAL SKILLS

Languages	C#, Python, PHP, JavaScript, Java, HTML5, CSS, jQuery, React
AI / ML	Python-based ML pipelines, AI workflow automation, OpenAI API integration concepts
Databases	MySQL (schema design, complex queries, stored procedures, CRUD), SQL Server concepts
Frameworks	Python Django, ASP.Net Core (C# MVC), PHP MVC, RESTful API design
Data & BI	SQL reporting, dashboard support, data-driven application design, operational analytics
Automation	Google Apps Script, Google Sheets/Forms/Drive API automation, workflow scripting, GHL
Dev Tools	Git / GitHub, command-line tools, basic BASH scripting, Python scripting, Cursor, Claude, Postman, Swagger
Soft Skills	Technical documentation, stakeholder communication, process automation, training

PROFESSIONAL EXPERIENCE

Competency Trainer / ICT Instructor | Tarlac Center for Learning and Skills Success

Aug 2022 – Aug 2025

- ▶ Designed and maintained a 3-year Diploma ICT curriculum covering C#, Java, Python, PHP, ReactJS, and database management applying structured software engineering principles throughout.
- ▶ Led project-based instruction simulating real-world software development: OOP design, data-driven applications, system integration, and SQL-backed workflows.
- ▶ Developed comprehensive technical documentation, assessment tools, and training materials demonstrating strong process documentation and knowledge-transfer skills.
- ▶ Communicated complex technical concepts across diverse skill levels, mirroring cross-functional stakeholder engagement in enterprise software delivery.

ICT Instructor | Golden Olympus Colleges Inc.

Jul 2020 – May 2022

- ▶ Instructed students in full-stack web development (HTML, CSS, JavaScript, ReactJS) and backend programming (C#, Java, PHP, MySQL) aligned with enterprise development standards.
- ▶ Implemented assessment-driven strategies evaluating applied technical skills consistent with Test-Driven Development (TDD) principles.
- ▶ Designed hands-on exercises covering database design, CRUD operations, and application logic, reinforcing enterprise data management foundations.

- ▶ Supported technical training delivery for Computer Systems Servicing programs, managing lab environments and hardware/software troubleshooting workflows.
- ▶ Maintained structured learning records and compliance documentation directly applicable to SLA management and process-driven software delivery environments.

KEY PROJECTS

Grading System · C# · MySQL

- ▶ Designed and built a full-featured academic grading system with automated grade computation, student record management, and report generation.
- ▶ Implemented relational database schema in MySQL supporting multi-subject, multi-section data with referential integrity.
- ▶ Delivered a Windows Forms UI enabling instructors to input, modify, and export grading data with minimal training required.

Enrollment & Billing System · C# · MySQL

- ▶ Developed an end-to-end enrollment and billing platform automating student registration, fee computation, and payment tracking workflows.
- ▶ Integrated dynamic billing rules to handle varying tuition structures, discounts, and installment scheduling reducing manual processing time.
- ▶ Built comprehensive reporting dashboards to give administrators real-time visibility into enrollment status and financial data.

School Directory · PHP · MySQL

- ▶ Created a web-based school directory application using PHP MVC architecture, enabling searchable staff and department records.
- ▶ Designed normalized MySQL database with optimized queries to support fast lookup across hundreds of records.
- ▶ Implemented role-based access control to differentiate admin and viewer permissions with secure session handling.

Profiler App · C# · MySQL

- ▶ Developed a Windows-based profiler application in C# for creating, managing, and displaying structured user and entity profile records with an intuitive UI.
- ▶ Designed and implemented a normalized MySQL database schema to handle profile data storage, retrieval, and search operations efficiently.
- ▶ Built CRUD functionality with data validation, enabling administrators to add, update, and archive profile entries with full audit trail support.

To Do List App · Python Django · MySQL

- ▶ Built a full-featured task management web application using Python Django, enabling users to create, organize, update, and delete tasks through a clean and responsive interface.
- ▶ Implemented Django ORM with MySQL backend to persist task data, supporting task categorization, priority levels, due dates, and completion status tracking.
- ▶ Designed user authentication and session management so each user maintains their own private task list with secure login and logout functionality.

Enrollment & Billing System (Google Workspace Edition) · **Google Apps Script** · **Google Sheets** · **Google Forms** · **Google Drive**

- ▶ Currently developing a cloud-based enrollment and billing system leveraging Google Apps Script to automate end-to-end student registration, fee generation, and payment tracking entirely within Google Workspace.
- ▶ Built custom scripts to process Google Form submissions, auto-populate enrollment records in Google Sheets, and trigger email notifications upon enrollment confirmation and billing updates.
- ▶ Designed automated billing workflows that compute tuition fees, apply discount rules, and generate printable billing statements eliminating manual data entry and reducing processing errors.
- ▶ Integrated Google Drive for organized document storage (receipts, enrollment forms) with structured folder management via script automation.

EDUCATION

B.S. in Software Development | **Brigham Young University – Idaho (BYU-Pathway Worldwide)**

Apr 2023 – Present

- ▶ Ongoing coursework in software engineering, data structures, algorithms, and enterprise application development.

Associate in Computer Technology | **STI College Tarlac**

Graduated May 2015

- ▶ Core studies in programming fundamentals (Java, C#), database design, and computer systems analysis.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- ▶ National TVET Trainer Certificate - Web Development NC III
- ▶ National TVET Trainer Certificate - Computer Systems Servicing NCII
- ▶ Web Development NC III - Tarlac Center for Learning and Skills Success (October 2025)
- ▶ Programming (JAVA) NC III - Saint Mark Technical Vocational Institute Inc. (Dec 2021)
- ▶ React - Complete Guide for Frontend Web Development (Online Certification)
- ▶ Deploy Scalable React Web Apps on the Cloud (Online Certification)
- ▶ Unleashing the Power of Azure AI: Microsoft AI Fundamentals Workshop (Sep 2023)
- ▶ How to Start in Data Analytics with SQL and Python (Jul 2022)
- ▶ Trainers Methodology Level I (Aug 2021)
- ▶ Computer Systems Servicing NC II - St. Paul College of Arts and Sciences (Apr 2017)
